

USING ICT IN HISTORY - YEAR TEN

Project: Produce a leaflet to promote or advertise the Roman Public Health system.

Getting Started: These are the steps you should take to set up your double sided leaflet:

- ? Log On
 - ? Open up Microsoft Publisher
 - ? Select Blank Publications
 - ? Double click on Full Page
 - ? Go to File - Page setup - Landscape - OK
 - ? Go to Arrange - Layout Guides - Grid Guides - increase columns to 3 - go to Margin Guides - move all to 0.6" - OK
 - ? Go to Insert - Page - OK
- At the bottom of the page click on the 1 box

You should now have 2 pages divided into 3 columns.

To insert textboxes:

- ? Click on the A icon on the left hand toolbar.
- ? Bring your mouse onto the blank page and using a left click open up the text box to the size you want.

Use the font and font size boxes to make your text look interesting and clear to read.

Complete your writing before you move onto inserting pictures.

The topics that you need to include are:

- ? Explain why the Romans thought Public Health was important
- ? Give examples of the different types of Public Health works eg Baths, Sewers and explain how they worked
- ? Use evidence from Primary sources to back up your points

Use the following websites to help:

<http://www.schoolhistory.org.uk/romanpublichealth.htm>

http://www.historylearningsite.co.uk/medicine_in_ancient_rome1.htm

<http://www.schoolhistory.co.uk/lessons/medicine/rome.html>

<http://www.romanbaths.co.uk/>

Remember that you are **SELLING** the Roman Public Health system so you must make your leaflet attractive.
